EXPERIENCE

Frame Tester - Frontend Developer

February 2020 – July 2020

As a frontend developer my domain was to build components and take part in design structure.
 Worked as a part of an agile and experienced team using react and typescript. B2C project with developers as clients , which takes content from developers and adds popular frames such as Safari, Facebook, Samsung Internet etc.
With Frame Tester, developers can get a more accurate and relevant overall picture of their websites.

This project is an infra-OS project.

PROJECTS

Venyou – *Mongo DB / Express / React.js / Node.js*

Inspired by Meetup, a full-scale marketplace web application.
based on MERN.
Includes:
- Google MAPS
- Notification system
- Socket for live comments
- Sign in with Facebook/Google

and many more features.
GIT - https://github.com/liathaf/CatchOn

Open-Source Contribution
React-Creates VSCode

JavaScript generator that creates react components for many used cases. Like typescript, scss, jest *template*, prop types, functional and class components. With the ability to cache your specific options.
Bonus - Working right now on CICD solution with Travis-Cl.

Freecodecamp
The largest nonprofit community that helps you learn to code.
https://www.freecodecamp.org/

Web Development Blog
The Coding Influencer

Sharing my knowledge and experience through friendly to understand articles.
Latest topics:
-Web Application Testing
- Open-Source Projects & Contribution
-Test Driven Development (TDD)
